

WORLD'S EASIEST
BACKUP

ABS^{PLUS}

Automatic Backup System

with BounceBack Professional Software

Designed to be the easiest backup and recovery solution in the world, ABSplus with BounceBack Professional software is perfect for Windows and Macintosh professional and home users who value their data and the time spent creating it. BounceBack creates an exact copy of your computer hard drive including files, applications and the operating system allowing for easy access and the immediate recovery of lost or deleted files. In today's world, a hard drive failure, virus attack, theft or loss can occur at any time; the ABSplus will protect you.

Automatic Backup System

with BounceBack Professional Software

POWERFUL FEATURES

Easy to Use

You don't need to know the ins and outs of computers to use the ABSplus, the software does all the work for you. From easy setup, simple reminders and flexible features, BounceBack takes the headache out of backup.

Fast Data Recovery

If you've ever had a hard drive fail or a computer stolen, you know the pain associated with the loss of data and the time associated with getting up and running again. BounceBack creates an exact copy of your computer hard drive enabling you to replace your failed hard drive with the ABSplus backup drive or boot directly from your external ABSplus (Mac only).

Quickly Restore Lost Files

Accidental deletions and misplaced files are a fact of life. Fortunately, CMS' QuickRestore feature offers immediate access to all previously backed up files. Just select the items to bring back and click on Restore.

Save Multiple Versions of Files

Have you ever been working on a document, gone through several versions, and then realized the first or second draft was the best? With BounceBack, changed files are backed up and maintained individually allowing you to review and compare all backed up versions of the same file.

BounceBack

PROFESSIONAL

Product Features	Description
Bootability	Replace your failed hard drive with your ABSplus backup drive (Windows and Mac) or boot directly from your external ABSplus (Mac only).
